

SCLB1200 Sand-stone Granulating Machine

SCLB1200 Sand-stone Granulating Machine

Model	Max. feeding granularity (mm)	Linear speed (m/s)	Motor power (kw)									Weight (kg)
SCBL-1200	45x60x80	50							185	220	255	11700
		45							240	285	325	
SCBL-1000	45x60x80	50					133	181	200			11300
		45					174	232	250			
SCBL-900	35x50x60	50			83	124						6700
		45			105	136						
SCBL-700	35x50x60	50	45	70								6400
		45	60	80								

SCL series sand stone granulating machine is developed and manufactured on the basis of SX sand making machine, choosing various ore and rock of which compression strength is not more than 300MPa to granulate. Different units of rotary speed and motor power are available according to customers' requirements. Under the condition of increasing rotary speed, sand stone granulating machine can be changed easily to sand making machine

according to users' demands. And its most spare parts can be exchanged with SX series sand making machine.

Features:

1. excellent granulating performance
2. wear-resistant parts: long useful time, convenient replacement, small in amount, low operational cost
3. low noise and vibration, less dust, conforming to the requirements of environmental protection.
